

S.1 CHEMISTRY TEST
ST. PETER'S SSS NSAMBYA
CHEMISTRY DEPARTMENT
TIME;1 HOUR
Term one

Instructions; answer all questions

Name;.....Stream;.....

Item 1

Chemistry is said to be the study of matter and properties of matter when exposed to different conditions. It's through these changes that human beings are able to manufacture different products by the help of chemistry knowledge.

Task; As s.1 student who has just studied about chemistry in the society

- a) Help the community members identify the products in everyday life that are manufactured by the help of chemistry knowledge and their uses.

Product	Uses
i)	
ii)	
iii)	
iv)	

- b) Help the community member know how chemistry knowledge is applied in the following sectors for betterment of the community.

- i) Health sector;

.....
.....
.....

- ii) Agriculture

.....
.....
.....
.....

iii) Transport;

.....
.....
.....

iv) Industry;

.....
.....
.....

Item 2

The Laboratory is a very important room at school because it helps students to be able to carry out experiments in the study of chemistry as it's an experimental subject. However, it's also a very dangerous place because it keeps hardous chemicals and delicate apparatus. Students can be harmed in the laboratory if not carefully sensitized about their conduct.

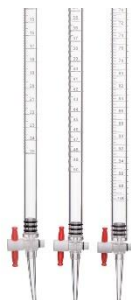

Task

As a s.1 student help the school community

- i) To set some rules and regulations and reasons for each that can help the students and staff members who frequently use the laboratory

.....
.....
.....
.....
.....
.....

- ii) Identify the common apparatus and describe the usage in the laboratory in order to obtain correct and accurate results

Name of apparatus	Use of apparatus
i)	
ii)	
iii)	
iv)
